INDUSTRIAL CLEANING

**Cleaning systems by Schmitz
For heat exchanger + condensers**

In collaboration with modern technology, Schmitz has manufactured and developed a state of the art cleaning system in the form of cleaning balls that are used to cleanse complex processing systems.

GREEN PRODUCTS

MaxR100TM is an intermetallic compound that forms a permanent bond to metal surfaces, which removes oil fouling, changes the thermal nature of the metal and lowers the boiling point of the refrigerant gas which lowers your AC energy cost by 25%.

The investment break even point is between 4-6 months and thereafter your investment will make money for you—every day.
